**Restriction**

1. Newly submitted claims 147-236 are directed to an invention that is independent or distinct from the invention originally claimed (claims 131-146) for the reasons below:

The invention of claims 131-146 requires using a template field in the instruction bundle to control issuance of instructions to the instruction units in parallel. The invention of new claims 147-236, on the hand, utilizes a single grouping bit within each instruction to enable parallel issuance of instructions.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 147-236 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.
